  - **Backend:** Node.js, Supabase, MySQL
  - **AI & Automation:** OpenAI API, AI note-taking tools, Selenium/automation scripting
  - **Tools:** Git, VS Code, FPDF, Excel automation
  - **Other:** UI/UX Design, Responsive Web Design, Cloud-based app deployment
- 

## Projects

### AI-Powered Note-Taking App

- Built a conversational AI notes platform integrating GPT, Supabase authentication, and secure cloud storage. - Implemented real-time speech-to-text transcription and intelligent summarization.

### E-Commerce Fertilizer Website (*Personal Project*)

- Developed a responsive online store with product listings, order management, and secure checkout. - Designed a clean, user-focused interface to enhance the shopping experience.

### YouTube & Multi-Platform Video Downloader

- Created a modern, intuitive UI with video search, thumbnail previews, and download functionality. - Added support for multiple streaming and video platforms.

### Betting Platform Automation (**Moors World of Sport**)

- Engineered Python scripts to automate login, betting, and cash-out workflows. - Designed a fixed-multiplier strategy for Aviator game automation.

### **Range Rover Spare Parts Business – Ads Campaign**

- Developed and executed a comprehensive Google Ads and YouTube marketing strategy to boost brand visibility.

---
